

SANI-HUB

The Humanitarian Sanitation Hub

In collaboration with

Project Partners

CAWST

Financially supported by

BILL & MELINDA GATES Foundation

- + Many useful platforms, tools, resources exist but:
 - + Fragmented, hard to find, and difficult to assess for quality and relevance
 - + Difficult for new/local staff to orient themselves
 - + Information only available in few languages
 - + Many high quality resources hidden on individual expert laptops and internal agency databases
- + Sanitation/FSM highly contextual where specific expert advice is required

- + **Coordinated global sector go-to-point** for sanitation and FSM practitioners that provides orientation and structured access to curated knowledge, resources, events, trainings and existing external platforms and tools
- + **Personal remote support** for humanitarian WASH practitioners and clusters via a helpdesk, CoP and team of experts
- + **Supports collaboration, increased resource efficiency and quality of work** through a sector-wide approach on knowledge management
- + Basis for a wider **WASH HUB (Roadmap Initiative 1)**

Structured knowledge Topical Entry Points

- Sanitation Project Cycle
- Challenging Contexts
- Sanitation Technologies
- Region/Country
- Wider Sanitation System
- Capacity Development
- Research, Innovation and Events
- Case Studies

Active workstreams on demand Community

GET INVOLVED

The SANIHUB Community

The purpose of the SANIHUB Community is to improve the quality of humanitarian sanitation services through the enhancement of knowledge sharing, joint sector learning and collaboration among humanitarian WASH actors.

Existing Emergency Sanitation Resources and Tools

- + FSM TWiG of the GWC transitioned into SANIHUB Community
- + Collaboration with national WASH clusters (e.g. CXB, LBN, Gaza foreseen)
- + Regular webinars, learning events (incl. livestream from this event), and LinkedIn community
- + Collaboration with WASH Roadmap and the WASH Hub initiative

 sanihub.info

 info@sanihub.info

- + Transitioning to WASH Hub (WRM Initiative 1): SANIHUB considered the starting point / blueprint for WASH Hub
- + Feasibility study on **integrating generative AI** both upstream (support collecting, curating) and downstream (UX design)
- + AI powered **multilingual support** and **data driven insights** (understanding capacity gaps buy analyzing user questions)
- + New **dissemination strategy** to reach the last mile
- + Expanding current innovation entry point to **marketplace for new technologies**
